Air Sourced Hot Water Heat Pumps

Quantum 270-AC3-134

Model Number	270-AC3-134
Hot Water Generating Rate (L/Hr)	75
Heating Capacity (kW)	3.53 (COP of 3.53)
Power Input (kW)	0.986
Typical Operating Amps (Amp)	10
Max Amps (Amp)	12
Voltage/Hz/Phase	220-240 / 50 / 1
Compressor (kW Rotary)	0.946
Refrigerant	R134a
Maximum Water Temperature (°C)	65
Connections	3/4" BSP
PTR Valve Setting (KPa)	1000
Sound level (dBA)	52
Dimension (Height X Diameter)	1900 x 650
Weight (kg)	135 kg

Note: Rated at 20°C ambient, and water heated from 20 to 60°C

Air Sourced Hot Water Heat Pumps

Quantum 270-AC3-134

The Quantum 270L Compact hot water heat pump is a market leading blend of performance, capacity and flexibility.

Delivering outstanding performance for domestic hot water applications the Quantum 270L delivers real energy and cost savings compared to traditional water heating modes, i.e. gas/ electric and boosted solar.

It's award winning state of the art technology ensures faultless year round hot water supply in rain, hail or shine! The unit is very simple to install and comes fully equipped with all controls, preset at the factory and simply requires connection of water and power.

TankWrap™ Technology
